of skin cancer, laser procedures
and cosmetic medicine.

General Dermatology

Diagnosis & Treatment of Skin Cancer

Advanced Lasers & Cosmetic Medicine

PRECISION, ARTISTRY and CARING®

Always on the forefront of new technology, our practice offers comprehensive dermatology and cosmetic services for people of all ages — from young children and teenagers, all the way through adulthood. Our state-of-the-art outpatient surgical facility is certified by the Institute for Medical Quality and is truly designed with patients' safety in mind. From the Fraxel re:pair® laser for targeting aging or damaged skin to the Vbeam Perfecta laser for treating broken blood vessels and a CLIA certified Mohs lab, we are confident that we are equipped to address your skin care needs and concerns.

“It is important to separate hype from science — choose procedures that have been shown to produce consistent and clinically visible results.”

Yardy Tse, MD

EXPERIENCE, KNOWLEDGE & SURGICAL JUDGMENT

Yardy Tse, MD is Board Certified by the American Board of Dermatology and is a Fellow of the American Academy of Cosmetic Surgery. Practicing in San Diego for over 15 years, Dr Tse is recognized by physicians and patients alike for her expertise in the diagnosis and treatment of skin cancer. Dr. Tse is also highly regarded for her proficiency in laser surgery and cosmetic medicine.

Skin Cancer — early detection is critical. Skin cancer is the most common form of cancer in the United States, with more than one million cases diagnosed each year. Most skin cancers are treatable but only when detected early — what may appear to be harmless changes in the skin are often early warning signs.

Mohs Surgery — the most precise and effective method for treating skin cancer. Dr. Tse is a Fellow of the American College of Mohs Surgery. She has extensive training in this specialized surgery. Dr. Tse routinely performs Mohs treatments and is proficient in all aspects of this procedure, including anesthesia, anatomy, surgery, pathology and reconstruction.

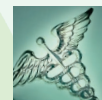

AGING BEAUTIFULLY IS AN OBTAINABLE GOAL

Advanced Lasers / Cosmetic Procedures. We specialize in a multitude of laser and cosmetic procedures — all proven to be safe and effective by FDA standards. Equipped with an “arsenal” of 11 of the most advanced lasers, Dr. Tse has the liberty of pairing numerous treatment options for her patients. We offer Tumescant MicroLiposculpture, mini face lifts and eyelid lifts, along with other treatments for eliminating or minimizing the appearance of wrinkles, birthmarks, rosacea, age spots, spider veins and sun damage.

Aesthetic Injectables are a safe and effective approach for a refreshed and natural looking appearance without surgery. Dysport® and Botox® are used to relax facial muscles, while dermal fillers such as Restylane®, Perlane®, Juvéderm®, and Sculptra® are used to restore lost volume and lift specific facial features. These treatments are ideal if you are looking to smooth away frown lines and wrinkles with little or no downtime.

Aesthetician Services. Many of our patients are looking to rediscover the fresh, healthy skin enjoyed in younger years. Our aesthetician services will leave you looking and feeling radiant and refreshed.

In addition to exceptional patient care, Dr. Tse believes in making you look like you, only better. She works closely with each patient and combines advanced technology with precision, artistry and caring for elegant and natural results.
