

Fraxel Laser

IMPROVE SKIN PIGMENTATION, TEXTURE AND REMOVE WRINKLES

WHAT IS FRAXEL LASER TREATMENT?

Fraxel® re:store Laser is the newest, state-of-the-art treatment for sun damaged skin and wrinkles. A non-invasive treatment, Fraxel re:store Laser stimulates the formation of new collagen to improve lines, wrinkles, and acne scars.

WHO IS A GOOD CANDIDATE?

Patients with early to moderate lines and wrinkles will achieve the best results. Deeper lines will be softened and minimized.

WHAT IS THE TREATMENT LIKE?

The skin is first numbed with a topical anesthetic. The Fraxel re:store Laser is then carefully and meticulously guided on the skin surface. A mild sunburn sensation immediately after treatment is common.

HOW MANY TREATMENTS ARE NEEDED?

Since each Fraxel re:store Laser treatment targets only a fraction of the skin's surface, more than one treatment is required. Depending on your skin type

TREATMENTS & PROCEDURES

and the condition being treated, 4 to 6 treatments are recommended for optimal results.

IS THERE ANY DOWNTIME?

Temporary redness and swelling may occur and last for several days afterwards. Since the skin is sensitive immediately after treatment, intense sun exposure should be avoided for 1 to 2 days.

WHAT TYPES OF RESULTS CAN I EXPECT?

Even after only one Fraxel re:store Laser treatment, your skin will become softer, smoother, and fresher. After the series of treatments, fine lines and uneven pigmentation will noticeably fade and pores will shrink. Your skin will appear tighter and smoother. Final improvement may continue for up to 6 months.

WHAT AREAS CAN BE TREATED?

Since the top layer of skin is not removed during Fraxel re:store Laser treatment, even delicate areas such as the neck, chest, arms, and hands can be treated.

WHAT OTHER TYPES OF SKIN CONDITIONS CAN BE TREATED?

Fraxel re:store Laser can also be effective for treating acne scars, melasma, and a condition known as poikiloderma of Civatte – extremely sun damaged skin of the neck and chest which appears as a mottled patch of red, brown, and white.
